

### **Complete Management of Your Network Data**

The IRISnGEN Ad-Hoc Reporting package is an optional feature that opens up the IRISnGEN database for full custom reporting.

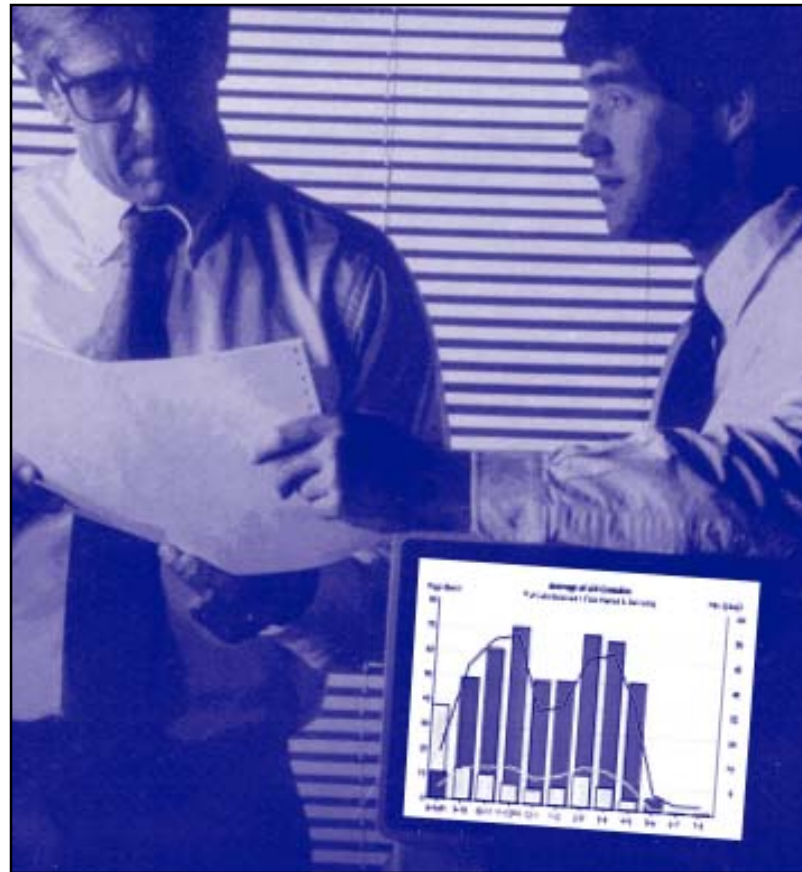

IRISnGEN Ad-Hoc Reporting:

- Lets you create custom IRISnGEN reports based on data fields in the IRISnGEN database
- Allows you to modify existing reports to fit your organizational and management needs
- Provides tools for exporting reports in a variety of formats

IRISnGEN Ad-Hoc Reporter, utilizing Seagate's Crystal Reports Pro™, the acknowledged leader in Windows report writers and analytic reporting solutions, produces reports from the IRISnGEN database tables. Customers desiring additional reports beyond the standard set provided can use Ad-Hoc Reporter to produce customized reports. It is easy to design your own reports with unprecedented flexibility and control. The export capability also helps integrate your reports with other applications. You can generate reports using any combination of data within IRISnGEN and export them to a database, spreadsheet, Web page, or word processing application.

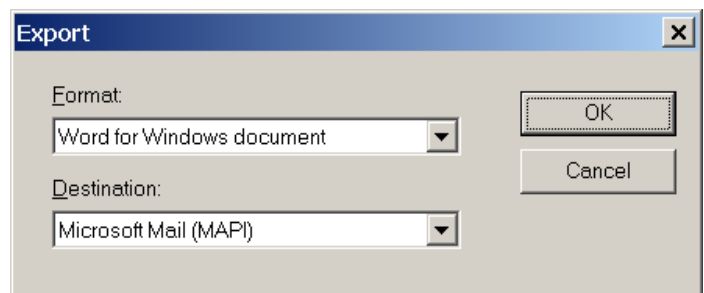

The Ad-hoc reporting module consists of the following components:

- Crystal Reports Pro™
- Ad-hoc Reporting manual
- IRISnGEN Database Schema chart

Reports can be exported directly to other applications including:

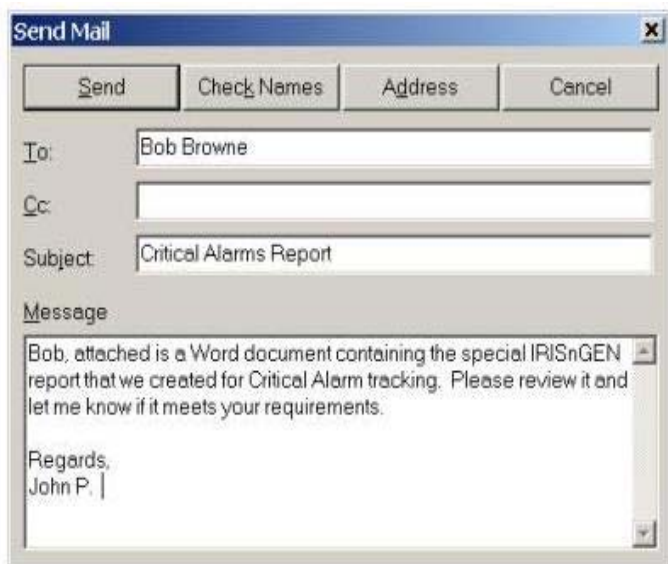

- MAPI (E-Mail/MS Mail, Exchange)
- Microsoft Exchange Public Folders
- Lotus Domino
- Disk file
- Application

Reports can be exported in the following formats:

- HTML
- Microsoft Word
- Excel (5, 7 and 8, Tabular or Standard)
- Lotus 1-2-3
- Lotus Notes
- ODBC datasource
- Crystal Reports Pro™
- Report Definition
- Character, Tab or Comma Separated
- Portable Doc Format (PDF)
- Data Interchange Format (DIF)
- Record style (columns of values)
- Rich Text Format (RTF)
- Text or Paginated Text

Although a variety of standard reports are provided, creation of new reports is easy using Crystal Reports Pro Software. If custom applications are needed, fields can be added or deleted from existing reports.

IRISnGEN saves created report formats for future use. After familiarizing yourself with Crystal Reports Pro™ software, you can write more complex or detailed reports, link and join fields, produce graphical or statistical reports and embed graphics.

IRISnGEN Ad-Hoc Reporter provides complete custom reporting to manage your organization's network needs.
